## Community Survey - Kapunda Swimming Pool

Light Regional Council is inviting the community to help shape the future of the Kapunda Swimming Pool through a public survey to inform a Kapunda Swimming Pool Future Directions Plan.

For more than 70 years, the pool has been at the heart of Kapunda and the Light Region, bringing people together for recreation, fitness, water safety education and social connection. Now, as the facility ages, Council is planning ahead to ensure it continues to serve the community for generations to come, and we need your input.

Council is currently undertaking a comprehensive study to explore the long-term future of the facility and identify opportunities to improve and enhance the pool for future generations.

Community feedback will play a vital role in helping Council understand how the facility is currently used and what residents would like to see in the future. We want to hear directly from our community about what they value most about the pool and how they would like to see it evolve.

**This is your opportunity to have a direct say.**

We want to hear:

- How you currently use the pool
- What you value most about the facility
- Your ideas for future improvements
- Your priorities for the pool moving forward

The Future Directions Plan is being delivered in partnership with aquatic and recreation specialists, 180 Sport and Leisure Solutions and includes a detailed assessment of the facility, community consultation and the development of future options for Council's consideration.

While no funding has been committed at this stage (outside of usual maintenance), the survey is intended to gather information only and does not commit Council to any specific redevelopment option or future expenditure.

The study will provide valuable information to support future decision-making. Community input is an essential part of this process. The feedback received will help ensure any future planning aligns with local needs, industry best practice and long-term community expectations.

Public swimming pools are more than just places to swim, they support community health, wellbeing, water safety and social inclusion. Recent research by the Royal Life Saving Society Australia highlights the important social value generated through community pool facilities across Australia.

Your voice will help ensure the Kapunda Swimming Pool continues to deliver these benefits into the future.

The survey is now open and can be completed online until 9am Monday 6 July 2026.
